Claims 1, 3-5 and 8 are allowed. Regarding applicant's remarks, it is noted that only claim 8 mentions frequency of operation, and not of the claims reflect a particular pressure requirement. Thus, these arguments were given no weight in determining the patentability of the claims. Applicant has made a compelling case for the nonobvious combination of substituting a specific, piston type piezoelectric pump, with piezoelectric valves in place of an electromagnetic pump in an ear probe.

The drawing sheet filed 3-22-07 is acceptable.
